**Notes:-**

**In 1988 the Harbour Commissioners assumed responsibilities for pilotage in Fowey and Par from Trinity House. The par pilot boat provided towage and berthing assistance as part of the duties and it was necessary to have a vessel which could provide a relief in Par as well as Fowey. The Yarra was chartered out from her original role in Hull docks where trade had dropped to work in Weymouth.**

**She had a conversion to carry out the role with side decking being built over the gunwales and the wheelhouse which originally was able to be lowered into the hull for road transportation was modified and secured. Her gantry was also modified with a new exhaust system.**

**Her other duties in Fowey include moving barges and mooring plant and she was used extensively during the major harbour works converting the sewage scheme in 1995 -96**
